Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1- 4, 6, 14, 15, 16, 18-24, 26, 30, 31, 33, 34 are rejected under 35

U.S.C. 102(b) as being clearly anticipated by Begeja et al.

See Begeja et al Abstract, where they disclose a remote call forwarding feature associated with a PBX. All a remote subscriber has to do to enable the remote call forwarding feature is to dial or key pad in a feature code. For claim 4, Begeja et al mentions that a PBX is involved in their invention, and it is well known that a PBX is used in a business environment with many employees, i.e., having many subscriber accounts.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7, 27, 29, are rejected under 35 U.S.C. 103(a) as being unpatentable over Begeja et al in view of Martin et al '707.

Martin et al telecommunications system discloses call forwarding @ col. 12, line 20, and in col. 27, lines 46-47, a group identifier is disclosed. To have provided Martin et al group identifier in Begeja et al call forwarding method would have been obvious to

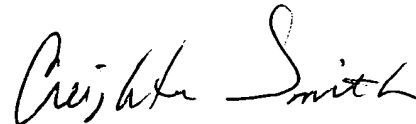

Art Unit: 2614

a person having ordinary skill in the art because both references are dealing with call groups in the context of call forwarding and the person possessing ordinary skill in the call forwarding art will realize the elements of apparatus can be used in the other apparatus.

Claims ⁸9-13, 17, 25, 28, 32 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
